**Dear Dr.Basu,**

You took care of my daughter Ankita aged 11 years who had a serious problem in her eyes. Her right eye was nearly +6 and left eye was nearly +3.5. We as a parent were very much worried. She was initially treated in Kenya. When we did not get any improvement, we brought her to AIIMS New Delhi and other major eye hospitals in Delhi but all in vein. In the mean time, I was transferred to Italy- Rome where I thought that I will get good medical facilities and took her to the best Eyes clinics. My daughter was referred to one of the Ratina specialist in Rome where she was under the treatment for nearly 6 months but no improvement. Finally, I met one of my old friend who referred Dr. Basu in Bareilly (U.P) INDIA I brought my daughter from Rome to Bareilly for the treatment and it is really amazing that after the treatment for nearly six months, she is perfectly all right.

Following return back to Rome, I went to my old Doctor in Rome who was treating Ankita When she again examined my daughter, she was not only shocked but amazed and asked me how the vision has come to normal. I replied that we had a treatment in India- Bareilly. She advised me that if this Dr. can visit Rome, she can refer so many patients who have similar problem like Ankita.

I am personally very grateful for your full attention and treatment. Now my daughter is not wearing any glass and she is fully O.K.

I am also grateful to my friend who is currently in Sudan for referring and introducing Dr. Basu.

Regards
